## EDUCATION

### Gujarat University, CPC Department

*B.Sc in Information Technology*

Ahmedabad, India

July 2023 – May 2026

- Currently in 6th Semester with strong focus on software development and web technologies
- Relevant Coursework: Data Structures, Algorithms, Database Management, Web Development, AI/ML

### Gujarat Secondary and Higher Secondary Education Board

*Secondary & Higher Secondary Education*

Gandhinagar, India

Completed

## EXPERIENCE

### Django Developer Intern

*InfoLabz IT Services Pvt. Ltd.*

May 2025

Ahmedabad, Gujarat

- Designed and implemented Django models to optimize data management and improve application performance
- Customized Django admin panel interface, enhancing user experience and administrative efficiency
- Collaborated with development team on real-world projects, strengthening problem-solving abilities and backend development skills
- Gained hands-on experience in Python web development, ORM concepts, and web application architecture

## PROJECTS

### AI Voice Assistant (JARVIS) | *Python, JavaScript, MySQL, ChatGPT API*

Jan 2025 – Mar 2025

- Developed full-stack web-based AI assistant integrating ChatGPT API for natural language processing and intelligent conversational responses
- Built interactive web dashboard using JavaScript for managing custom commands and user interactions
- Implemented MySQL database architecture for storing user data, command history, and system logs
- Designed RESTful API endpoints to handle voice commands and facilitate seamless frontend-backend communication

### Grocery Store E-Commerce Platform | *HTML, CSS, JavaScript, Python, MySQL*

Jan 2025 – Mar 2025

- Engineered dynamic e-commerce website with secure user authentication and session management
- Developed shopping cart system with product catalog, real-time inventory management, and order processing features
- Implemented responsive design principles ensuring optimal user experience across mobile, tablet, and desktop devices
- Created MySQL database schema for managing products, users, orders, and customer inquiries with normalized tables
- Integrated contact form with backend validation for customer support and feedback collection

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, SQL, HTML, CSS

**Frameworks & Libraries:** Django, Flask, Bootstrap

**Databases:** MySQL, Mongo DB, SQLite

**Tools & Technologies:** Git, REST APIs, Oracle Cloud Infrastructure

**AI/ML:** ChatGPT API Integration, Prompt Engineering, Generative AI

**Soft Skills:** Problem Solving, Team Collaboration, Project Management, Communication, Adaptability

## CERTIFICATIONS

### Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

2025

- Validated expertise in Generative AI fundamentals, LLM usage, and prompt engineering techniques
- Demonstrated proficiency in vector embeddings and building AI-powered applications using OCI services
